"Laser and Photonics World- In the International Year of Light"

In this talk, the role of laser and light in photonics science technology will be reviewed. I will introduce a laser that I invented; VCSEL (Vertical Cavity Surface Emitting Laser) and initiation of its research. Then, the technology and systems in photonics world are introduced. Finally, the application and future photonics will be discussed.

日 時:平成27年11月15日(日) 19:30-21:00(質疑応答含む)
会 場:東京国際交流館 D棟203号室
